This image shows the parts list for step 61. On the left, a large black number '61' is displayed. Below it, a small inset image shows a partial view of the model being built. To the right, two LEGO parts are shown: a white 1x6 Technic beam and a yellow 1x10 Technic plate. Each part is accompanied by the quantity '1x'.

This diagram illustrates step 76 of a LEGO assembly. The main structure features a grey motor at the rear, connected to a series of grey and black Technic beams. A red rectangular box highlights a specific connection point on a black beam, where a small white and black component is being attached. The assembly is built using a variety of Technic parts, including yellow, black, and grey beams, and orange and white Technic bricks. A small inset in the top left corner shows the two components being added: a white 1x2 Technic brick with a black pin and a yellow 1x4 Technic brick. The number '76' is prominently displayed in the top left corner.
